scent, taste and
health solutions

OUR STORY SO FAR

Establishes TMV
Shenoi Perfumers
as a trading and
blending house
for essential oils
and fragrances

Launches TMV Naturals
Oils & Extracts (P) Ltd.
to produce spice oils,
spice oleoresins, natural
extracts and colours

Sets up offices
and warehouses
in the USA

1958

1991

2005

2020

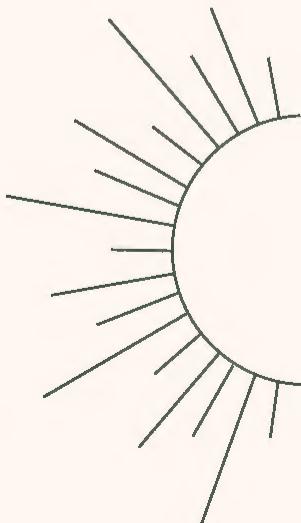

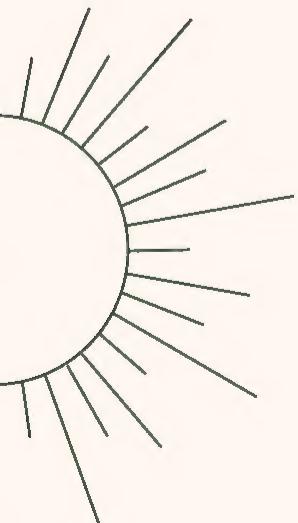

Establishes TMV
Aromatics (P) Ltd.
to manufacture
essential oils,
natural isolates and
design fragrances

With growing demand
for curcumin, expands
to a dedicated turmeric
extraction unit

Joins hands
with Fine
Aromatics to
expand to
New Zealand

MISSION

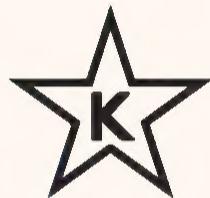

To be a customer-
centric, sustainable
enterprise that
delivers high
quality products

INFRASTRUCTURE

MEMBERSHIPS/AFFILIATIONS

ESSENTIAL OILS

Essential oils are the concentrated aroma and flavour characteristics of spices, roots, bark, leaves, herbs etc.

We manufacture a wide range of essential oils in state-of-the-art steam distillation plants.

Our essential oils have been a necessary part of several fragrance, flavour, aromatherapy, and cosmeceutical applications for the last 65 years.

NATURAL ISOLATES

Naturally occurring components present in an essential oil are isolated from the natural source using the least invasive methods to expand the perfumer's palette in exotic yet nature-conscious directions.

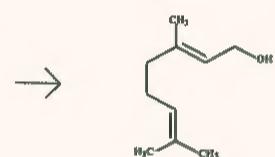

Our advanced plant is equipped with fractional distillation columns of varying heights with structured packing from **SULZER**.

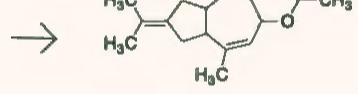

CITRONELLAL EX CITRIODORA OIL

VETIVERYL ACETATE

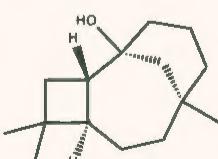

RHODINOL EX GERANIUM OIL

CARYOPHYLLENE ACETATE

TERPENYL METHYL ETHER EX D'LIMONENE

CARYOPHYLLENE ALCOHOL

SPICE OLEORESINS

Spices undergo solvent extraction to produce a combination of oil and resin that is predominantly used as a more economical and cleaner alternative to whole or ground spices as a flavouring agent.

We manufacture oil and water-soluble oleoresins and can also adjust the level of active principle and oil levels.

SUPER CRITICAL FLUID EXTRACTS

Natural materials are processed using liquid carbon dioxide to produce pure and solvent-free oils and extracts that maintain the natural taste and odour of the botanical extracted.

This process is more eco-friendly and green than conventional methods.

NATURAL EXTRACTS & FOOD COLOUR

At TMV, we produce the natural extracts of curcumin and boswellia.

Curcumin: A primary bioactive ingredient found in turmeric, is widely used as a culinary condiment, a natural food colouring agent and as a nutraceutical ingredient with numerous proven benefits.

OUR PROCESS

1/SOURCING

At TMV, we follow a farm to factory approach by partnering with farmers who follow traditional and eco friendly farming methods. We have also set up field distillation units at the source of most of our raw materials for better oil recovery.

2/ PRODUCTION

At our plants, raw materials transform into high quality products that retain their natural characteristics with minimum processing. We also have high columns for steam and fractional distillation columns of varying heights with structured packing from Sulzer.

3/ANALYSIS

All our products go through an elaborate testing process conducted by an experienced team of scientists at our state-of-the-art lab.

4 / RESULTS

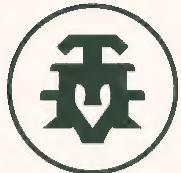

Our finished products, delivered to the client in UN approved barrels, are an ode to the wonders of the nature, scientific progress and the skill and hardwork of our dedicated team.
